¹ The term ‘alignment’ refers to the formal processes the IPSASB® follows to assess the applicability of IFRS® Accounting Standards and/or GFS requirements when developing pronouncements that faithfully represent the economic substance of transactions in the public sector. Through these processes, the IPSASB aims to reduce unnecessary differences with these sources of guidance when they can also be applied in the public sector context. Outstanding presentation-related consequential amendments do not impact IFRS Accounting Standards alignment categorization.

The most significant examples are the use of the terms "statement of financial performance" and "net assets/equity." The equivalent terms in IFRS 9 are "statement of comprehensive income or separate income statement (if presented)" and "equity." - IPSAS 41 does not distinguish between "revenue" and "income." <u>Leases</u>				
IPSAS 43	IFRS 16		- IPSAS 43 uses different terminology from IFRS 16. For example, IPSAS 43 uses the terms “revenue”, “operation”, “accumulated surpluses/(deficits)” and “segment”, while IFRS 16 uses the terms “income”, “business unit”, “retained earnings” and “business segment”, respectively. - IPSAS 43 refers to both “economic benefits” and “service potential”, where appropriate, in the section on identifying a lease, while IFRS 16 refers only to “economic benefits”. - IPSAS 43 does not include specific requirements for manufacturer or dealer lessors, whereas IFRS 16 does. - IPSAS 43 includes specific measurement requirements on concessionary leases for lessees, whereas IFRS 16 does not. - IPSAS 43 includes specific disclosure requirements on concessionary leases for both lessees and lessors, whereas IFRS 16 does not. <u>Non-current Assets Held for Sale and Discontinued Operations</u>				
IPSAS 44	IFRS 5		- IPSAS 44 requires disclosure in the notes of the fair value of a non-current asset (or disposal group) classified as held for sale if fair value is materially different to the carrying amount; - IPSAS 44 replaces the IFRS 5 definition of a cash-generating unit with the definition of a cash-generating unit defined in IPSAS 26, <i>Impairment of Cash-Generating Assets</i>; - IPSAS 44 acknowledges that public sector combinations differ from business combinations and can be either an acquisition or an amalgamation. Therefore, IPSAS 44 requires assets acquired in a public sector amalgamation that are to immediately be classified as held for sale to be measured at the lower of carrying amount and fair value less costs to sell; and - IPSAS 44 uses different terminology in certain instances from IFRS 5. The most significant examples are the use of the terms “operation”, “public sector combination”, “revenue”, “owner”, “controlling entity” and “controlled entity”. The equivalent terms in IFRS 5 are “business”, “business combination”, “income”, “shareholder”, “parent” and “subsidiary”. <u>Property, Plant, and Equipment</u>				
IPSAS 45	IAS 16		- IPSAS 45 refers to both “economic benefits” and “service potential”, where appropriate, in the section on recognition of an item of property, plant, and equipment, while IAS 16 refers to “economic benefits”. - IPSAS 45 at initial measurement requires that an item of property, plant, and equipment acquired through a non-exchange transaction be measured at its deemed cost (fair value). IAS 16 does not have such a requirement. - The subsequent measurement models in IPSAS 45 are historical cost and current value models, while in IAS 16 the models are cost and revaluation. - IPSAS 45 for subsequent measurement has two measurement bases in the current value model - current operational value and fair value. IAS 16 revaluation model has only one measurement basis - fair value. - Under IPSAS 45 revaluation increases and decreases are offset within a class of assets basis, while in IAS 16 are offset on an asset basis. - IPSAS 45 has disclosure requirements for unrecognized heritage assets, while IAS 16 does not have such a requirement. - IPSAS 45 does not require the disclosure of the equivalent historical cost amounts, where an entity adopts the current value model and carries items of property, plant, and equipment at revalued amounts, while IAS 16 does. - IPSAS 45 requires the disclosure of the sum of all revaluations, surpluses and deficits for individual items of property, plant, and equipment within that class. IAS 16 does not have such a disclosure requirement. <u>Measurement</u>				
IPSAS 46	IFRS 13		- IPSAS 46 provides guidance on historical cost, current operational value, cost of fulfilment and fair value. IFRS 13 only provides guidance on fair value. - IPSAS 46 requires an entity to apply the measurement disclosure requirements in the relevant IPSAS. IFRS 13 includes all disclosures about fair value measurement. <u>Revenue</u>				
IPSAS 47	IFRS 15		- IPSAS 47 applies to all revenue transactions in the public sector, which may arise from transactions with or without binding arrangements. IFRS 15 applies to a subset of binding arrangements, specifically contracts to deliver goods or services to customers. - IPSAS 47 explicitly requires an entity to determine whether the revenue arises from a transaction with or without a binding arrangement. IFRS 15 does not explicitly require an entity to determine whether the revenue arises from a contract. - IPSAS 47 uses the term “compliance obligation” as the unit of account for revenue recognition in a binding arrangement, which is a promise to either use resources internally for distinct goods or services, or to transfer distinct goods or services to another party (i.e., a purchaser or third-party beneficiary). IFRS 15 uses the term “performance obligation” as the unit of account for revenue recognition in a contract, which is a promise to transfer distinct goods or services to a customer. - The concept of compliance obligations in IPSAS 47 is broader than performance obligations in IFRS 15. As a result, IAS 20, <i>Accounting for Government Grants and Disclosure of Government Assistance</i> is not applicable for public sector organizations because IPSAS 47 includes principles to account for capital transfers and other transfers arising from binding arrangements. - IPSAS 47 requires an entity to disclose any transactions where it is compelled to satisfy an obligation, regardless of the counterparty’s ability or intention to pay and the probability of collection of consideration. IFRS 15 does not require this disclosure. - IPSAS 47 uses different terminology from IFRS 15. For example, IPSAS 47 uses the terms “compliance obligation”, “resource provider”, “stand-alone value”, and “economic substance”, while IFRS 15 uses the terms “performance obligation”, “customer”, “stand-alone selling price”, and “commercial substance”, respectively.
