

## **BACKGROUND NOTE ON ACTION PLANS**

The SMO Action Plan is intended to provide a summary of:

- The legal and regulatory environment for the profession;
- The status of adoption of international standards and best practices in the jurisdiction; and
- The Member's or Associate's activities to fulfill IFAC membership requirements.

IFAC [Statements of Membership Obligations](#) (SMOs) require IFAC Members and Associates to support the adoption<sup>1</sup> and implementation<sup>2</sup> of international standards and other pronouncements issued by independent standard-setting boards under the auspices of IFAC as well as by the International Accounting Standards Board (IASB); and to establish a quality assurance (QA) review and investigation and disciplinary (I&D) systems. The SMOs are recognized as the international benchmarks for credible and high-quality PAOs that are focused on and have the necessary expertise to serve the public interest and meet the market demands of their respective jurisdictions.

IFAC Members and Associates conduct a self-assessment against the requirements of SMOs and identify areas where, if any, improvements are needed. Members and Associates should develop an Action Plan to (a) demonstrate how they fulfill the requirements of the SMOs (revised in 2012), and (b) where some requirements are not yet addressed, to present plans towards their fulfillment. Action Plans are designed to be **ever-green** documents that take into consideration IFAC recommendations. Depending on the PAO's level of fulfillment (see *IFAC's Summary Assessment* – page 2), an Action Plan may not be necessary for each SMO section and instead the '*Attestation of Ongoing SMO Compliance*' is used to confirm their ongoing commitments. However, PAOs may wish and are welcome to utilize the Action Plan as a tool to demonstrate how they are using 'best endeavors' and going beyond their mandate with innovative approaches to fulfilling the SMOs and strengthening the national profession.

The specific details of each organization's actions will vary even where two PAOs are involved in the same SMO area. Each PAO operates in its own unique regulatory and standard-setting framework and has different operating, technical, and resource capacities. Moreover, in deciding when and how a particular SMO requirement is to be addressed, PAOs might have differing timeframes and objectives to achieve. Notwithstanding these inevitable differences, seeking the advice and assistance of other PAOs who have already faced and dealt with similar challenges can save significant time and resources. IFAC staff will offer assistance as needed.

Regular updates of the SMO Action Plans are required as part of the [IFAC Member Compliance Program](#).

### **Use of Information**

Please refer to the [Disclaimer](#) published on the IFAC website.

---

<sup>1</sup> *Adoption* is concerned with the decision that international standards are appropriate for use in specific national financial reporting environments and with the actions necessary to affect those decisions, including incorporation into national requirements or requiring the use of international standards through law. Adoption may include a process to review draft international standards, translation, public exposure of proposed standards, approval, incorporation into national requirements as necessary, and promulgation of final standards, and, where applicable, a convergence process to eliminate or minimize differences between international and national standards.

<sup>2</sup> *Implementation* may include a process to build awareness of the adopted standards, provide relevant education and training, develop, or disseminate implementation guidance and any other activities that promote proper understanding and use of the standards in practice.

## **ACTION PLAN**

**IFAC Member:** Institute of Authorized Chartered Auditors Albania (IEKA)  
**Approved by Governing Body:** Council of IEKA  
**Last Update:** June 2025

**IFAC's Summary Assessment:** *IFAC staff will complete this section at the conclusion of each SMO Action Plan review and update process. PAOs are encouraged to take staff's recommendation into consideration as part of future strategic planning conversations at the PAO. For more information on [IFAC Member Compliance Program](#) and the legends used to describe the status of adoption of international standards, best practices, and fulfillment of SMO requirements, please refer to the Status of Adoption [methodology](#) and SMO Fulfillment [methodology](#).*

### **Attestation of SMO Compliance**

The **Institute of Authorized Chartered Auditors Albania (IEKA)** has developed an Action Plan to demonstrate how it fulfills the requirements of the SMOs (revised in 2012). The abovementioned *Governing Body* has reviewed the information contained within the SMO Action Plan and affirms that the **IEKA** continues to undertake these and other relevant actions to maintain ongoing compliance and fulfillment of the membership obligations where IFAC's assessments are at *Review & Improve* and/or *Sustain*. In areas where IFAC's assessments are at *Execute, Plan, Consider, or Not Active* the **IEKA** has updated the Action Plan to reflect the specific actions to adopt or support adoption and support implementation that must be taken to achieve the improvement accompanied by a timeline.

On behalf of the **IEKA**, the *Governing Body* endorses the information contained within the SMO Action Plan as of the publication date and its publication on the IFAC website in the interests of transparency and to demonstrate our commitment to enhancing the quality and credibility of the accountancy profession worldwide.

**Action Plan Subject:** SMO 1–Quality Assurance

**Action Plan Objective:** Adopt relevant standards and improve the existing regulatory requirements for audit firms to comply with ISQC 1 and review the functioning of the Quality Assurance Review System

**Background:**

Following the promulgation of Audit Law No. 10091 on March 5, 2009 (first issued in 2009, amended in April 2016, and [amended again in January 2025](#)) in Albania was established Public Oversight Board (POB). It has responsibility for overseeing the statutory auditors and the activities of IEKA related with the auditor's profession. Its activities are carried out in accordance with the specific regulations adopted by a Government decree no. 786, date 9.11.2016. Since the amendment audit law entered in force in 2016 the POB is completely in charge of the Quality Assurance (QA) review system and for reviews the quality of all audit engagements undertaken by Albanian statutory auditors duly registered with Albanian Public Register of Statutory Auditors and all auditors and audit firms are reviewed according to the law at least once every six years and more frequently for new members, and in cases where non-compliances is suspected, and in practice based on a system of so called risk based. IEKA is in negotiations to obtain the delegation of the QA for non-public interest entities and also requesting for changing the government decree of January 2019 related to PIE criteria, because in the number of PIEs, actually are included even small or less complex entities, an issue that has also been addressed as a negative development in the latest ROSC report (2019).

In 2025, authority was delegated to IEKA to conduct the reviews of non-PIEs. IEKA has appointed two inspectors who have attended seminars held by the World Bank together with the inspectors of the POB.

Prior to the legislative revisions in 2016, IEKA was responsible for the conduct of all QA reviews. It had established and implemented its QA review system that was in line with the requirements of SMO 1 and will continue to use these [procedures](#) for reviews of non-PIE audits. IEKA has translated the relevant standards – ISQM 1, 2, and ISA 220 (revised) – for application.

The institute reports that it provides support to its members with the implementation of QM standards and has developed tools and conducted trainings for the reviewers and members to better understand QA review procedures and implement them in practice.

**Action Plan Subject:** SMO 2–International Education Standards for Professional Accountants and Other Pronouncements  
**Action Plan Objective:** Make continuous improvement with the ongoing incorporation of International Education Standards (IESs)

**Background:**

The Law No. 10091 of 2009 On Statutory Auditing and Organization of the Accounting Profession, modified in 2016, provides provisions for initial professional development (IPD) and continuous professional development (CPD) requirements for professional accountants in Albania. The Law requires candidates to have a formal professional education, obtain practical experience (a minimum three years of practical experience with a reputable statutory auditor or audit firm recognized by the IEKA. During the three years, the candidate must perform at least 600 hours of work in audit engagements), pass examinations, and maintain continuous professional development. IEKA is also involved in verifying practical experience requirement for aspiring auditors established by the law, which requires a minimum three years of practical experience with a reputable statutory auditor or audit firm recognized by the IEKA. During the three years, the candidate must perform at least 600 hours of work in audit engagements. Reports from the employer on the candidate's progress are submitted to the IEKA every six months.

Certification/examination of professionals is conducted by the Examination Commission under the POB. The Commission comprises five members (representing the Ministry of Finance, Ministry of Economy, National Accounting Council, IEKA and one representative from the PAO for accountants). IEKA indicates that through the Commission [assessments](#) are undertaken in line with IES 6.

IEKA members are required to complete at least 120 hours of Continuous Professional Development (CPD) over a three-year period (40-60 hrs. per year). Compliance with this requirement is monitored. The professional accountancy education program is delivered by IEKA and by the licensed state owned and/or private higher education Institutions.

IEKA reviewed the education requirements, so they now comply with International Education Standards (IESs), EU statutory audit Directive, the Albanian Audit Law, and has also improved the delivery of accountancy education and CPD trainings. IEKA also promotes relevant requirements to Universities.

The new modification made in the audit law entered in force in April 2016, stipulates a curriculum for IPD and CPD which is fully in line with the IES. This was made possible with the full cooperation of IEKA staff and volunteers. The educational model mirrors the model adopted by the Association of Chartered Certified Accountants and/or other reputable professional bodies in the EU. In 2019, IEKA [launched a new model for education of auditors](#) that is based on extending university education to professional settings. The new approach involves integration of educational programming delivered by higher education institutions (HEIs) and IEKA. To achieve this objective, IEKA worked over several years to align its curricula with international benchmarks and to assist HEIs to align their programs with the IEKA professional program at the basic and intermediate level. In 2019, an [upgraded curriculum](#) fully aligned with the 2019 IES was introduced that was developed as part of the World Bank Corporate Financial Reporting Enhancement Project. Within the new system, in addition to HEIs classes, candidates attend professional courses delivered by IEKA. To complete the full transition to the new model, IEKA is developing a system for recognition or accreditation of local HEIs and other international programs.

**Action Plan Subject:** SMO 3—International Standards and other Pronouncements Issued by the IAASB

**Action Plan Objective:** Developing an ongoing process for convergence with IAASB pronouncements

**Background:**

According to the legal framework, IEKA has responsibility for translation and adoption of International Standards on Auditing (ISAs), which are mandatory auditing standards in Albania. The professional accountancy body has translated the 2018 Edition of the Handbook of International Auditing, Assurance, and Ethics Pronouncements and adopted the International Standards on Auditing (ISAs). IEKA updates the program of its CPD courses in an ongoing manner to enhance the implementation of ISAs.

ISAs are obligatory for all the statutory audits. Initially it was decided by IEKA in 2003, while it has been reconsidered and put as a provision in the audit law in 2009, modified in 2016.

By December 2012, IEKA had completed also the translation and publication of the first part of the Guide to Using International Standards on Auditing in the Audits of Small- and Medium-Sized Entities (*ISA Guide*). By June 2014, IEKA in cooperation with SCAAK Kosovo, has completed the translation and published the second part of the Guide to Using International Standards on Auditing in the Audits of Small and Medium Sized Entities (*ISA Guide*).

The [Albanian translation](#) of the 2018 IAASB Handbook is being applied. IEKA and SCAAK have translated the 2021 Handbook of International Quality Control, Auditing, Review, other Assurance, and related services pronouncements which is pending approval by the POB. ISQM 1, 2, and ISA for LCE have been translated separately for distribution amongst its members.

**Action Plan Subject:** SMO 4–IESBA Code of Ethics for Professional Accountants  
**Action Plan Objective:** Update IEKA Code of Ethics in accordance with the revised IFAC Code of Ethics and continue to support implementation of ethics requirements.

**Background:**

The POB is ultimately responsible for the approval of the Code of Ethics of statutory auditors. The law mention that this Code must comply with IESBA Code. Ethical requirements included in the IEKA Code of Ethics (approved by Public Oversight Board in September 2010) which is based on the International Ethics Standards Board for Accountants (IESBA's) Code of Ethics (effective from January 2011), will be further updated.

IEKA as the only professional accountancy body of auditors has also established an ongoing process for reviewing the pronouncements of the IESBA and plans to adopt in reasonable time the versions of the IESBA Code. POB has an important role to play regarding ethics, assigned by legislation. Changes in the code of ethics by IEKA must be endorsed by the POB.

The 2023 International Code of Ethics for Professional Accountants has been [translated](#) for POB approval.

IEKA has adopted the IESBA code with modifications to allow in some instances for more stringent requirements than what is required by the IESBA Code. Modified sections include those on professional ethics and incompatibility, conflicts of interest, and confidentiality and professional secrecy. Courses on ethical requirements are already part of the curricula on pre-qualification of candidates.

**Action Plan Subject:** SMO 5—International Public Sector Accounting Standards and Other Pronouncements Issued by the IPSASB  
**Action Plan Objective:** Continue to promote the use of International Public Sector Accounting Standards (IPSASs) to the Albanian Ministry of Finance and to assist it with the translation, adoption, and implementation of IPSASs

**Background:**

The Albanian Ministry of Finance (MoF) oversees translating and adopting International Public Sector Accounting Standards (IPSASs). The Ministry of Finance has not yet adopted IPSASs, but IEKA informs it on the latest activities of the International Public Sector Accounting Standards Board (IPSASB) and the new IPSASs issued. The professional accountancy organization also publishes information on the trends and developments occurring in the field of public sector accounting via IEKA website and bimonthly magazine.

There are PFM reforms underway to adopt and implement accrual-basis standards that are based on IPSAS. With funding from the Swiss State Secretariat for Economic Affairs (SECO), the World Bank is supporting the MoF in the implementation of the reform strategy including translation of IPSAS and organizing training from Chartered Institute of Public Finance and Accountancy (CIPFA). An estimated timeframe for the first-time implementation of IPSAS is 2027.

Cooperation activities of IEKA also include training of public administration accounting staff in response to the MoF request. In addition, IEKA contributed to the translation process of IPSASs into Albanian in 2007-2008. To our best knowledge, no other translation has been made after this version.

**Action Plan Subject:** SMO 6—Investigation and Discipline

**Action Plan Objective:** Continue to improve IEKA's system on Investigation and Discipline (I&D)

**Background:**

The Audit Law has transferred disciplinary powers from the Commission for Disciplinary Issues to the POB, which is now responsible for disciplining IEKA members. The Investigation Committee of IEKA is responsible for investigating its members and forwarding the cases to the POB which judges them. IEKA has reviewed the investigation and disciplinary regulations to ensure they meet SMO 6 and the Audit Law requirements. The professional body will also undertake additional activities to raise its member' awareness about disciplinary rules.

With the modification made to the audit law, the POB role is enhanced and strengthened. The POB is ultimately responsible for professional disciplinary measures of any form. They have the right in exceptional cases to conduct investigation and disciplinary processed. They have gone further to law requirements with drafting their own regulation on investigation and discipline.

The IEKA's regulation on the Disciplinary Committee is prepared in full compliance with Audit Law requirements. Misconduct is defined as per the SMO 6 and extended. POB is the only body for taking disciplinary actions. The POB is made up of non-practitioners only nominated by the Ministry of Finance, so as their independence is not 100 percent provided. POB imposes sanctions involving removal or practicing rights for any regulatory breaches by IEKA's members. Initiation of proceedings is complaints based as well as information based. Independence is always maintained and formally declared.

The new law on audit stipulates that complains against a disciplinary measure taken by the POB can be filed with the administrative court in Albania. Outcomes of the disciplinary actions in the POB are made available in IEKA's website.

**Action Plan Subject:** SMO 7–International Financial Reporting Standards and Other Pronouncements issued by the IASB

**Action Plan Objective:** Continue to assist the National Accounting Council and other authorities in converging and implementing IFRSs

**Background:**

The Accounting Law of 25/2018 requires listed entities, large unlisted entities, and financial institutions to prepare their legal entity and consolidated financial statements using IFRSs. Albania applies IFRSs as endorsed by the IASB. IFRS standards are obligatory banks for fiscal and investor purposes. However, for prudential reporting, the Bank of Albania (BOA) requires that banks use a BoA reporting methodology that is not aligned with IFRS, according to the [World Bank \(2019\)](#). With assistance of the World Bank, a new methodology has been prepared based on the European Banking Authority (EBA)'s FINREP standards which aligns with IFRS. 2026 is the timeline for implementation of the new methodology.

The IFRS are translated in Albanian language and are readily available online at the National Accounting Council's website and IASB website. The NAC has set up a translation committee which is regularly translating the new revised standards.

All other companies follow Albanian National Accounting Standards (NASs) set by the National Accounting Council of Albania (NAC) and approved by the Minister of Finance. NAC has incorporated a large part of IFRSs in the NASs with modifications as NASs do not include all IFRSs disclosure requirements. NAC with assistance of the World Bank has completed the revision of NASs and the approximation of them with IFRS for SMEs.

IEKA contributes regularly to the translation of new and revised IFRS, with translators and members of the review committee of NAC.

IEKA also assists with the implementation of NASs by providing training and publishing articles in its newsletter.
