

I Dumisani Msipa, recommend the move towards introducing an output orientated approach to Continuing Professional Development Standards as proposed by the International Accounting Education Standards Board, (IAESB). In my opinion, the move will enhance quality service delivery by all professional Accountants going through the CPD Standardised sessions of trainings and, it will in a greater way improve the approach of handling issues by Accountants in this technologically affected field on Accountancy. The IT industry activities are one among others, of critically influential factors to the Accountancy Industry. This calls for aligning standards with ever advancing technology. The (IES) 7 can be one best approach that will embrace the needs of aligning knowledge and skills already acquired with current trends.
