

Comments on Advancing Public Sector Sustainability Reporting:

- **The public sector's role in relation to maintaining sustainability and meeting the needs of today without compromising the future is crucial.**
- **The current state indicates a radical increase of anti-environmental actions that will most definitely compromise the 17 SDGs, that's why with collaboration with other international bodies, the international public sector accounting standards board's experience , processes and relationships would most definitely enable it to develop a global public sector specific sustainability specific guidance effectively that would act as a compass for all public sectors globally.**
- **Furthermore, a criterion which public sectors globally would apply should be considered as a necessity as it would work as a standard for all public sectors.**

The international public sector accounting standards board's development of a public sector specific suitability reporting guidance according to the most pressing topics in a descending order:

- **Zero hunger**
- **No poverty**
- **Good health and well-being**
- **Clean water and sanitation**
- **Quality Education**
- **Reduced Inequalities**
- **Climate Action**
- **Decent work and economic growth**
- **Affordable and clean energy**
- **Gender Equality**
- **Industry innovation and infrastructure**
- **Sustainable cities and communities**

- **Life on land**
- **Life below water**
- **Responsible consumption and production**
- **Peace justice and strong institutions**
- **Partnerships for the goals.**
- **Although the 17 SDGs are all crucial, prioritizing the protection of global human capital would preserve the future as it goes hand –in-hand with the core of sustainability.**
- **Finally, we think that in order to achieve sustainable development, it is a global duty to contribute financially or throughout data exchange and collaboration between public sectors globally.**
